1—DONNA PENDANT

STINA SANDWALL
NINA JOBS
2019

The pendant lamp Donna gives a feeling of soft pleated textile although the material is of thin metal. We were inspired of material in fashion, chic ladies and the challenge to transform a hard material into a soft feeling! Versatile when it comes to usage and both beautiful at home and in public spaces.

2—BOUNCE PENDANT

MONIKA MULDER
2019

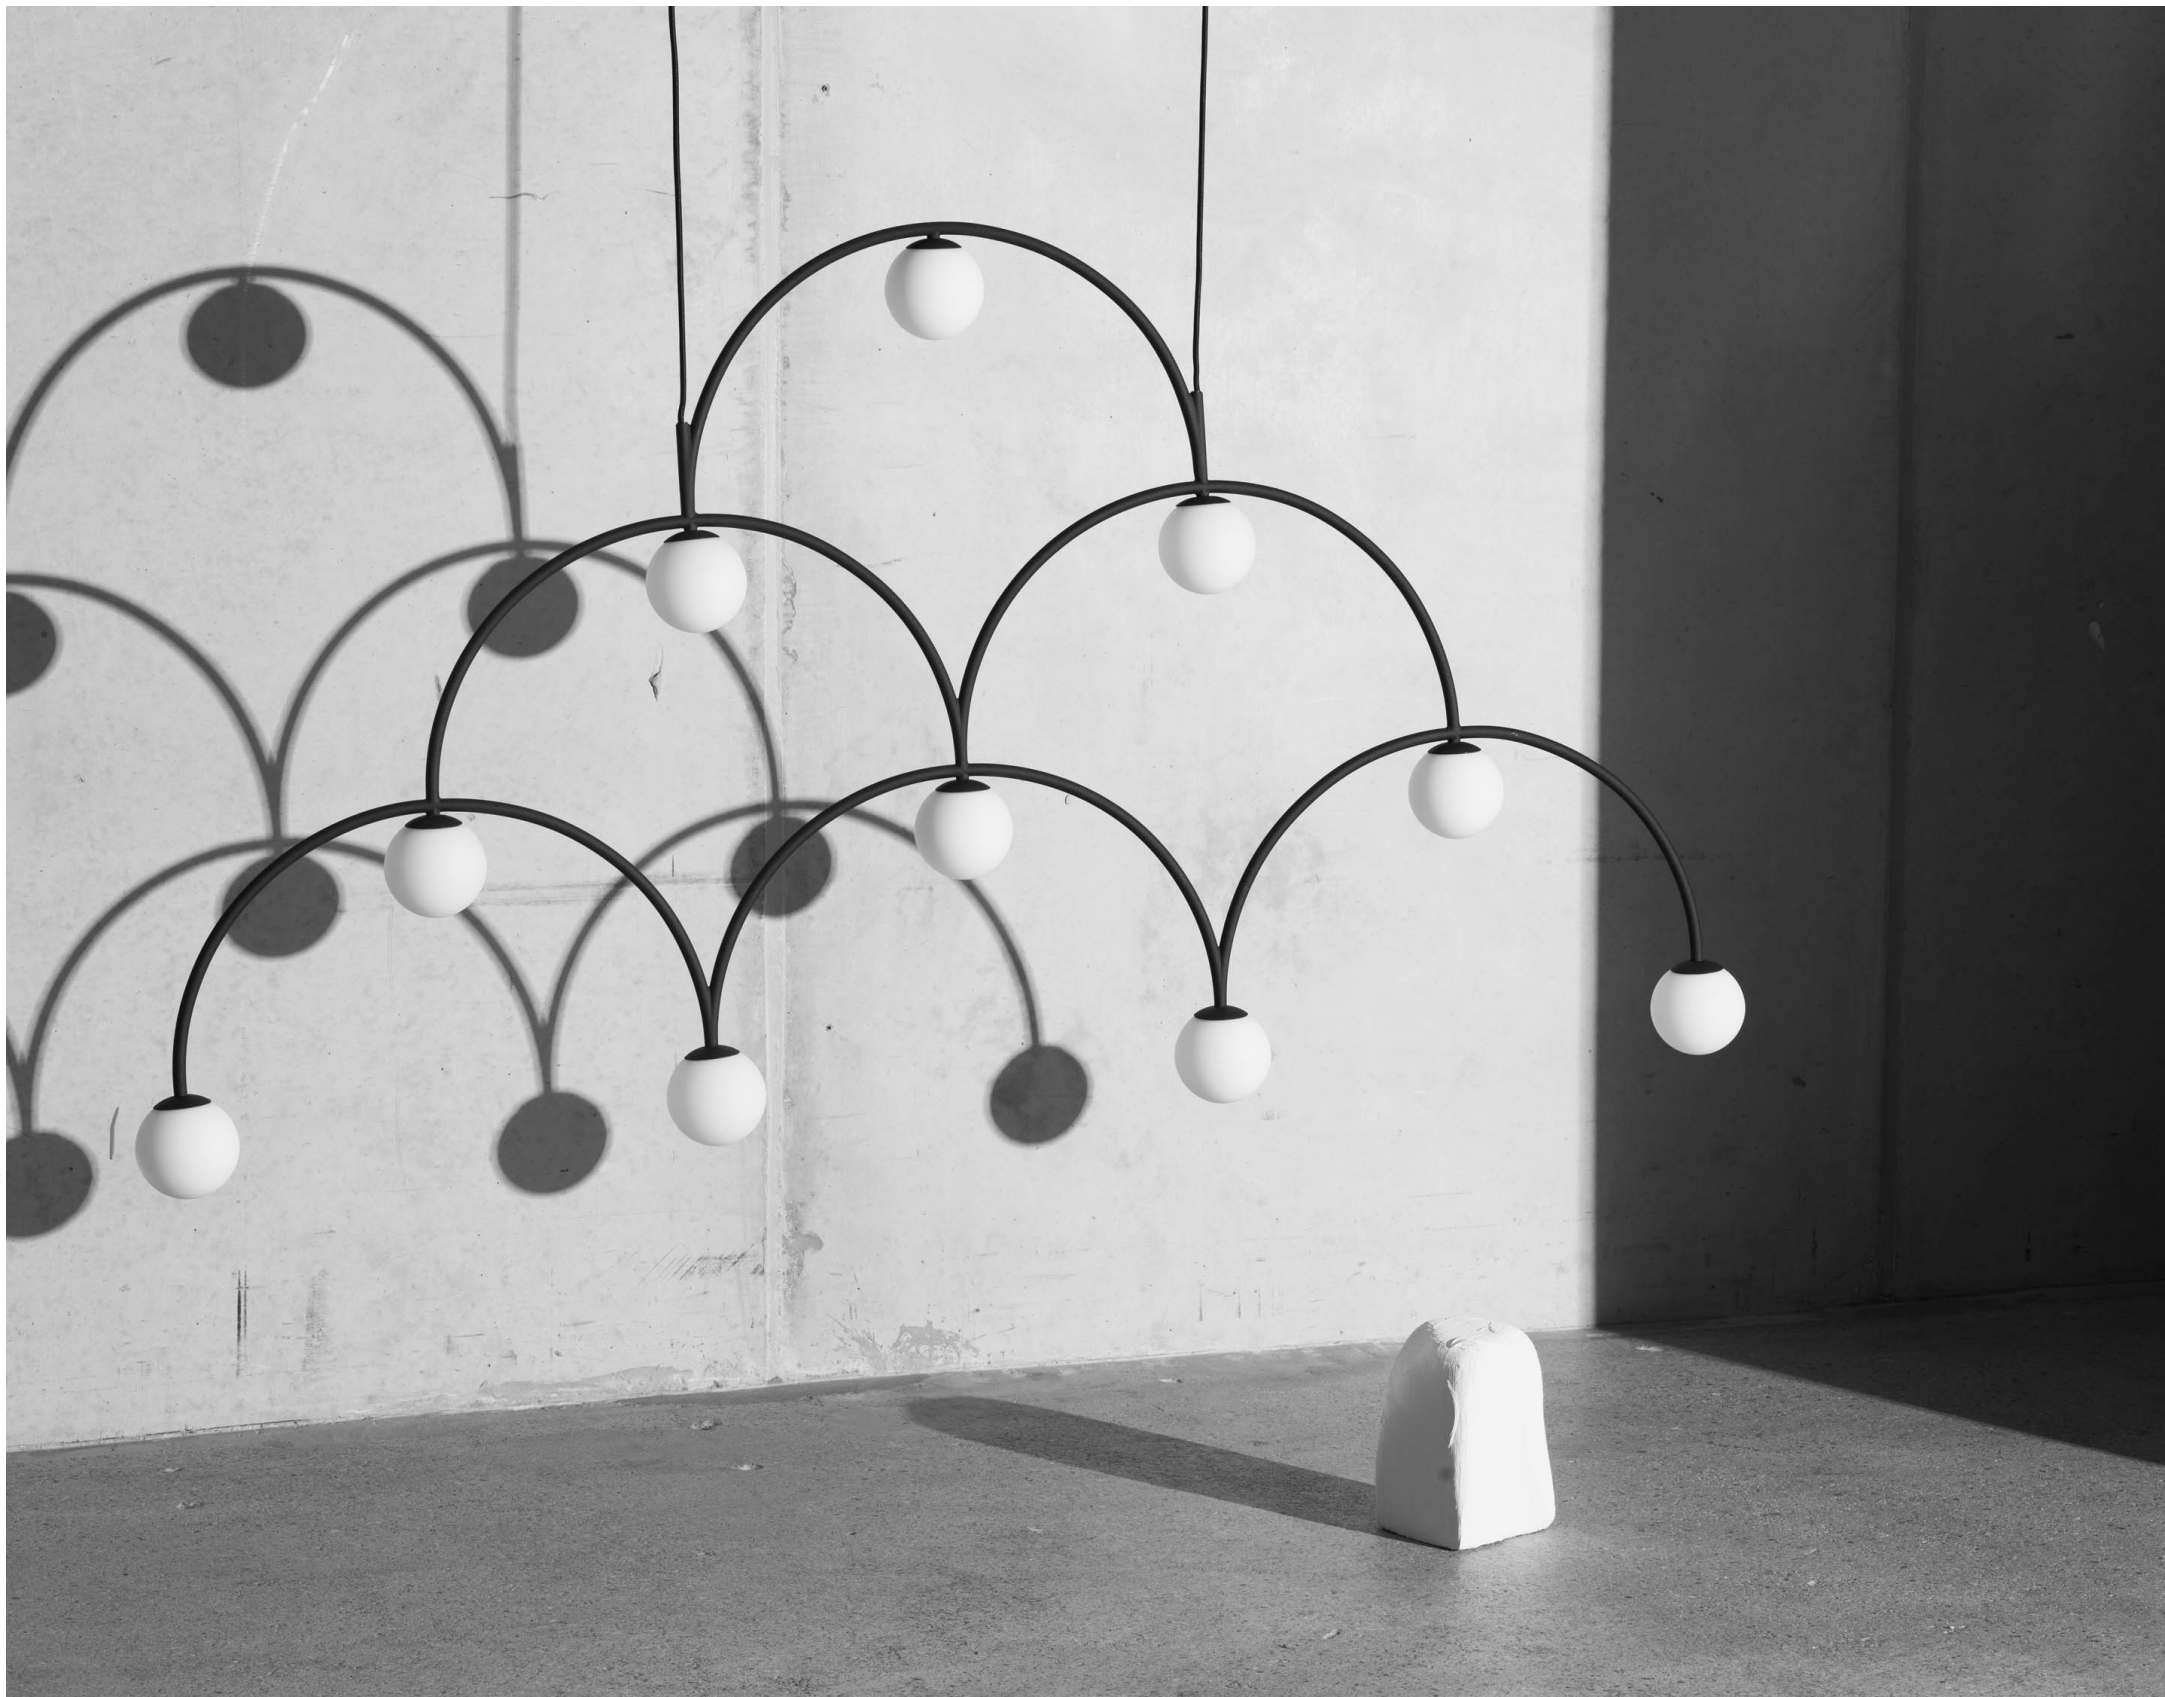

The pattern that Bounce creates is energetic, graphic and bouncy. A positive graphic feeling. I wanted to create a lamp that gives the room character and at the same time gives light. With that in mind, I created a graphic expression with a focus on the path the electricity is drawn from light spot to light spot. The result is a flat, screen-like luminaire that fits well over oblong tables or counters.

3—KANDINSKY PENDANT

BROBERG &
RIDDERSTRÅLE
2019

This pendant lamp is inspired by the abstract circle paintings by Wassily Kandinsky during his years at the renowned Bauhaus school in the 1920's. A sphere and a spear act as the main characters in the lamp composition, piercing each other in midair to create an object that evokes a sensation of weightlessness, fragility and precision. The custom-made light source is shaped and fitted seamlessly as a part of the brass spear and emits a glowing, dimmable light from the center of the hand-blown smoke colored glass. The Kandinsky lamp is available in two sizes with a 300 or 450mm wide glass bubble. It functions well as a lamp or object to set the mood of a room, hanging in numbers in a large space or as a single piece over a table.

4—APOLLO PENDANT

BROBERG &
RIDDERSTRÅLE
2018

Apollo is a lamp with a very high sense of material presence. The assembly of conical shapes that balance on top of each other like spinning gyros, emphasize the downward force in a pendant lamp and create both dynamic and static expression. Machine-turned from a solid piece of brass or aluminum, these shapes show not just a beautiful raw metal surface but also alludes to its mass and weight.

5—MOBIL PENDANT, TABLE LAMP & WALL LAMP

MONIKA MULDER
2016

—Give me a lamp that will look great in a New York loft. With those words I started to work with a new series for pholc. Using black metal tubes and round glass was a given for me, when thinking of the typical New York balcony racks in black metal and the round streetlights on Brooklyn Bridge. Working with these ‘ingredients’ resulted in a ceiling lamp where 4 equal parts are linked to each other. The construction resembles a mobile when the elements are turned, so giving this unique lamp its name.

6—PEARLS PENDANT

MONIKA MULDER
2016

—Jewelry often carries a story about the people who have worn it and the era in which they lived. It projects a story about identity, history and sometimes even of love. A deeper meaning that captures and communicates a distinct personality. Inspired by the delicacy of jewellery, ‘Pearls’ adds character and flair to a room in the way that jewelry gives the person who wears it character.

7—EDGE PENDANT

MONIKA MULDER
2017

Inspired by the reflection of light, the Edge lamp creates an image of parallel lines in different shades of color through the intricate use of shadows. Every edge is unique and therefore reflects light differently, so creating the desired effect of different colours and contrasts within the design.
