Space Copenhagen's new portable table lamps come equipped with the latest battery-operated technology.

Ensure the ambiance is always right with two new table lamps from Space Copenhagen: Manhattan SC52 and Como SC53. Both portable, these pieces are equipped with a discreet dimmer that allows for three different settings to match lighting to mood.

Manhattan's columned base, made from anodized aluminium, lends a subtle ridging effect to its industrial silhouette. A cream-coloured canvas shade contrasts with the dark vertical base.

Como is crafted from anodized aluminium, with a sturdy base that tapers up towards a mushroom-shaped shade. Although it's made entirely from metal, there is a gentleness to its curves that feels thoroughly contemporary.

Both lamps are equipped with the latest technology to ensure ease of use. They boast 11 hours of operating time in the highest setting, with an extra battery option for additional operating. A magnetic USB charging cable handles individual charging, while a multi-charging tray allows 12 lamps to be charged together. To transport the lamps en masse, a trolley has been designed that can carry 36 of them at once.

"Our new lamps were designed as multipurpose pieces that could be moved easily and maintained efficiently," says Space Copenhagen co-founder Signe Bindlev Henriksen. "They will bring a cool, contemporary edge to any space, from a hotel bedroom to a restaurant interior."

Founded in 2005, Space Copenhagen is a design studio that works across multiple disciplines, from furniture and lighting to art installations and interior design. Referring to their approach as "poetic modernism," the studio's commitment to quality and longevity results in contemporary designs with timeless appeal.

&Tradition is a Danish design company established in 2010 with the founding principle being tradition tied to innovation. Our unique portfolio of furniture and lighting spans from the 1920s to the present day and includes designs by internationally renowned designers.
